

## Testimonials

My daughter has been suffering with Fibromyalgia for many years. Since she has been using the "EB" (2 months now), the whites of her eyes are no longer yellow, her skin is clearer and she seems to have more energy.

**KP-Williamsburg, Kentucky**

I've been on acne medication since the age of 11. The "EB" is the only thing that helps me stay off medication and control my adult acne conditions.

**TT - Phoenix, AZ**

My daughter and son-in law both use their "EB" regularly. My daughter has Lupus and her swelling has reduced dramatically while her fatigue levels have improved markedly. My son-in-law has terrible gout and since starting to use the "EB" he's had tremendous relief and won't go without doing an "EB".

**JD - Pt. Pleasant, NJ**

I'm 70+ years of age and am having amazing results using the "EB". At one time I would have over 10 injections of medications daily for heavy metal toxicity and now I'm injection free! I've gotten a new lease on life.

**LL - Sault St. Marie, ON Canada**

Had a patient who for years spray painted heavy equipment without the use of a respirator and subsequently had severe joint pain specifically in his knees from the

toxic fumes. After 4-5 treatments the joint pain in his knees has subsided.

**WCA Wichita, KS**

We had a patient that had full body skin eczema. After one treatment with only the patients' hands in the "EB" he had an 80-90% improvement in the skin irritation.

**Dr. Patricia Ruether-Mankato, MN**

The "EB" proved its alkalinity capabilities to us when one patient was sharing with another his story. He had been on two packs of Roloids for over 15 years. After three "EB" treatments he was able to quit taking Roloids all together and he no longer has any acid reflux conditions.

**Dr. Don Force - Smyrna, GA**

71 year old patient with severe edema and gout had 16 "EB" treatments. Now for the first time in over two years she was able to spread her toes and wear shoes again. Her swelling in her feet began to subside after 6-8 treatments.

**Dr. Donald Backstrom-Glen Ellyn, IL**

After my first "EB" treatment I completely lost the desire for cigarettes and quit smoking!

**MG - Lake City, FL**

The results I have experienced after only a few sessions are just shy of profound. My results so far

include shorter recovery times between hard interval workouts, greater power on the bike, better quality sleep and fewer allergy symptoms. I have not reached for my allergy medicine once in the past four weeks. As an athlete I am looking for that extra 3-5 percent which means the difference between standing on the podium and just finishing with the pack. "

**Julie Kaplan, (9)x National Road Cycling Champion, (4)x National Time Trial Record Holder Current State TT champion**

"I have been treated by Dr. Terry for neck and back pain much of which was stress related. Recently he suggested the "EB" to help address allergy symptoms and low energy and fatigue that I have struggled with for many years since I turned forty. The results have been amazing. I have more energy and patience to deal with both my professional and personal life, and an overall sense of well being. An incredible side benefit, which certainly contributes to the above, is that my libido has greatly increased!! I feel like I have the energy and desire of an adolescent and the ability to now enjoy it!!! I highly recommend the "EB" for everyone.

**Anne age 51**

# "EB" Cellular Cleanse Therapy

Protecting Your Body's Health  
From The Inside Out

Every day your body is under constant assault from an endless array of toxic encounters. In the air you breathe, the water you drink, even the food you eat. While your body has certain cleansing abilities, it can't keep up. Now there are steps to help cleanse harmful toxins from the inside of your body. It's called the  
**"EB" Cellular Cleanse Therapy.**

# The "EB" Cellular Cleanse Therapy

The "EB" program has demonstrated through random clinical trials to enhance neurologic facilitation resulting in increased range of motion and muscle strength.

## Treatment Overview

We're taught as children the importance of hygiene, constantly washing our hands and bathing daily, all to keep our body clean and prevent illness from outside germs. What about the inside of our body and the toxins exterior cleaning can't reach?

People are constantly being exposed to unhealthy levels of pollution including dangerous toxins and heavy metals. Consider our regular contact with:

- Air pollution
- Acid rain
- Fertilizers
- Contaminated water
- Rancid food from restaurants and stores
- Over chlorinated and fluoridated water
- Growth hormones present in many foods
- Antibiotics from direct and indirect sources
- Unhealthy food additives

The body's ability to cleanse itself internally simply becomes overloaded and toxic residues build up. As a result, the body's cells can't work at peak efficiency, setting off a domino effect for physical ailments and potential health problems that can include:

- Allergies
- Arthritis
- Immune deficiencies
- Migraines
- Fatigue
- Decreased muscle function
- Loss of flexibility
- Cancer
- Heart disease
- Circulatory problems
- Memory impairments

Now there are steps to help cleanse these harmful toxins from the inside of your body. It's called the "EB" Cellular Cleanse Therapy.

"EB"-305

## How it Works

The "EB" Cellular Cleanse Therapy is based on bioenergetics technology, creating an energy field similar to the energy produced by the human body. This field stimulates cellular energy and enhances the body's ability to internally cleanse itself naturally, at an increased rate, restoring and normalizing the body's correct pH balance and energy levels.

The principal is similar to how a magnet works. Except in this case, the magnetic force functions

to help cancel out and eliminate harmful free radicals and other toxins from the body. The "EB" Cellular Cleanse Therapy uses an aqueous solution (water & sodium chloride) in a foot bath as a conduit for exchanging ions. The energy field created within the body draws negative and positive ions together, helping negate their harmful effect while gently stimulating cellular cleansing.

Bioenergetics is important because the amount of energy within a person at the cellular level and their residual balance of energy have a direct correlation with the body's ability to problem solve, perform all types of work and to remove waste. In terms of bio-electricity, the cells of a healthy human organism have a negative potential of between 70 and 90 millivolts. Within this range of potential, nutritional absorption and the discharge of toxic waste are efficient. Stressed or injured cells on the other hand, can measure as little as 10-20 millivolts, resulting in both poor nutritional absorption and discharge of toxic waste. Such a condition can occur suddenly, as a result of an accident, or develop more slowly as a result of the progressive build up of positive ions due to the effects of modern diets, stressed life-styles and the impact of a toxic environment.

The "EB" Cellular Cleanse Therapy uses direct micro-current, generating ions between 300-400 mV providing energy that is sub-threshold, and very similar to low voltage electro-stimulation or cold laser, both of which have been proven to increase and create more cellular ATP (stored energy). This increase in cellular ATP allows the cells to work and purge at a higher rate and to withstand external stressors that can be either physical or chemical.
